Project Name	Rising waters
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • Need early flood alerts. • Predict floods accurately • Protect lives and property.	THINKS • Can floods be predicted early? • Technology can improve safety. • Better predictions save lives.
PERSONA NAME (Role / User Type)	

DOES

- Monitors weather conditions.
- Checks river levels.
- Shares flood warnings.

FEELS

- Worried about floods.
- Responsible for public safety.
- Hopeful for timely predictions.
