

No. of Functional Features Included in the Solution

Date	29 th June 2026
Team ID	XXXXXX
Project Name	Rising waters
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Input Form	Allows users to enter environmental parameters for flood prediction.	Frontend (HTML/CSS/JS)	Done	High
2	Data Validation	Validates user inputs before sending them to the backend.	Frontend	Done	Medium
3	Flood Prediction	Predicts flood risk using the trained Machine Learning model.	ML Model	Done	High
4	Probability Calculation	Displays flood and no-flood probability percentages.	Backend (Flask)	Done	high
5	Safety Recommendation	Shows an appropriate safety message based on prediction results.	Backend	Done	Medium
6	Model Integration	Integrates the trained ML model with the Flask application.	Backend / ML	Done	High
7	Responsive User Interface	Provides a clean and user-friendly interface across devices.	Frontend	Done	Medium
8	Prediction Result Display	Displays prediction results dynamically without page refresh.	Frontend & Backend	Done	High

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	User Input Form, Responsive UI, Prediction Result Display
2	Backend / Logic	3	Flood Prediction, Safety Recommendation, Model Integration
3	Database / Storage	1	CSV Dataset Storage
4	API / Integration	1	Flask API for Prediction
5	Security / Authentication	0	Not Implemented
